

Amendments to the Claims: This listing of claims will replace all prior versions, and listings, of claims in the application

Listing of Claims:

1. (Currently Amended) A multipurpose dispenser for use with batteries to dispense a product comprising:

a frame provided with wall support means and a front cover,

~~at least one deposit for a product to be dispensed,~~

at least one dispensing mechanism activated by driving means powered by said batteries, and

two deposits for products to be dispensed, where a first one of said deposits incorporates a valve, which in the top part thereof has a sprayer push-button that is activated by a pusher element driven by the movement of a first motor that is transmitted via gears and,

said first motor being powered by said batteries located in a housing and controlled by a control plate, which in turn controls and combines the operation of said first motor with that of ~~another a second~~ motor that drives a fan which circulates the air that is in contact with a product evaporated by a cord located in the second one ~~other~~ of said deposits, wherein said first motor and said second motor are activated independently one from the other, to run all this being combined in a simultaneous or alternatively, according to the control plate programming.

2. (Currently Amended) The multipurpose dispenser according to claim 1, wherein said cover comprises gratings in the top, central and bottom parts thereof, respectively, which cause the air current generated by the fan to circulate through them and the circulating air to come into contact with the product evaporated from ~~the said second~~ deposit by said cord.

3. (Currently Amended) The multipurpose dispenser according to claim 2, wherein said push-button is ~~a sprayer push-button which dispenses the product contained in~~ the said first deposit directly into the outside atmosphere via a window included for this purpose in the front cover of the dispenser, in simultaneous or

alternative combination with the dispensing of the product contained in the said second deposit by means of said gratings.

4. (Withdrawn) The multipurpose dispenser according to claim 2, wherein said push-button dispenses the product contained in the deposit into small pipes that are supported on the frame by a pin or support and traversed by an exit and directed towards the corresponding channels or pipes, to be treated in a dropwise manner, in simultaneous or alternative combination with the dispensing of the product contained in the deposit by means of said gratings.

5. (New) The multipurpose dispenser according to claim 1, wherein said push-button dispenses the product contained in said first deposit into small pipes that are supported on the frame by a pin or support and traversed by an exit and directed towards the corresponding channels or pipes, to be treated in a dropwise manner, in simultaneous or alternative combination with the dispensing of the product contained in said second deposit by means of said gratings.

6. (New) The multipurpose dispenser according to claim 3, wherein said push-button dispenses the product contained in said first deposit into small pipes that are supported on the frame by a pin or support and traversed by an exit and directed towards the corresponding channels or pipes, to be treated in a dropwise manner, in simultaneous or alternative combination with the dispensing of the product contained in said second deposit by means of said gratings.
